# Do you encounter any poor or bad results after a hair transplant operation?

About GetHair · https://gethair.co.uk/faqs/do-you-have-bad-results/

As every other clinic, we encounter poor results from time to time, but rarely.

There is no single doctor in the world who only has perfect results.

This is a medical procedure and therefore comes with a success rate.

At our clinics, we have **a success rate of around 92-95%**.
