How long does a hair transplant operation take?

General Questions · https://gethair.co.uk/faqs/duration-of-hair-transplant/

A FUE hair transplant operation usually takes between 4 and 6 hours. As the operation is carried out under local anaesthetic; you may watch a film or read magazines during the whole operation.

The duration of the surgery is directly related to number of grafts being harvested.

There are also other factors which influenced the duration of the surgery.
