I notice some hairs are attached to scabs and come off when washing, shall I be worried about it?

After Hair Transplant · https://gethair.co.uk/faqs/hairs-attached-to-scaps-after-hair-transplant/

No, this is very normal and expected. Those are only hairs, not hairs with roots. This happens after the operation as you are switching to the Telogen (dormant) phase. This has no effect on your final result.
