What is the process before the hair transplant operation?

General Questions · https://gethair.co.uk/faqs/process-before-the-hair-transplant/

You will have a blood test, and a consultation with your surgeon directly. Then we will work with you to decide your frontal hairline level in front of a mirror by drawing with pen.
You should not consume alcohol for the 4 days before the operation.

We advise against people with cardiac or hypertension problems having this operation, as the risk to health is too high.

The patient should eat before the operation.
