Do I need to use any product after my hair transplant procedure?

After Hair Transplant · https://gethair.co.uk/faqs/products-after-hair-transplant/

In hair transplant procedures, we do our best at every operation and use the most sophisticated instruments and surgery solutions available in the world to make sure our patients receive the optimum results.

But, a hair transplant operation results the best when the hair growth is supported with right products; such as an organic shampoo, dietary supplement, whey proteins, biotin tablets etc.

Although all these products are optional, we recommend them.
